

Mossback Farm

Now taking orders for...

Premium Pastured Lamb!

The low-down on our lamb...

Sustainable: Our lambs are primarily grass-fed from our pastures. They receive some grains and organic hay during the first 1-3 months depending on when they are born, but then nothing but grass until processing day. Their manure falls directly on growing pasture, fertilizing it and keeping it out of our streams.

Humane: The lambs spend their lives outside nosing through the grass, kicking up their heels, and getting plenty of fresh air, sunshine, exercise, and fresh forage daily. As anyone who has met them will agree, these are some happy lambs!

Local = Quality: Buying local food is good for both the consumer and the farmer. You get the benefit of being able to visit the farm where the animals are grown, and your food dollars stay local rather than going to some huge out-of-state food chain. Having personal relationships with our customers inspires us to provide you with products of the finest quality. We only raise and sell products that we eat, and we are the choosiest of consumers!

Tasty: Our lamb has wonderful flavor and texture and is very lean. Anyway you cook it, we know you'll enjoy it!

Details, details...

- the cost will be \$5/lb plus butchering cost which will be about \$65/animal

- lamb will be butchered by Frontier Custom Cutting in Carlton and will be ready for pick-up in late August or October

- a deposit is required to hold your order.

The deposit will be credited toward the final cost, and is non-refundable, unless we can't fill your order.
